

Please do not bump K-Love radio station. I am concerned that you would change the reception for this station. It provides a great way to hear news, announcements of free events, and it serves our community by giving honest commentary and uplifting announcements. It is in the public interest to keep this station because of their commitment to help anyone who listens. They provide such a wonderful service not offered by anyone else. They give a toll free number for people to call if they need help. They are truly servant oriented. They give a lot of people the emotional support they need to get through the day. Do not take our K-Love away, PLEASE! The effect of taking away K-Love would be increased road rage, increased tension. Take my word for that. Many times I get aggravated driving in my car, and by listening to K-Love, I am reminded of my duty to love my neighbor, even if they do not know how to drive. I can hear others listening to this station too. We need to keep our K-Love.
